have secured the accommodation. The Accountant-General, Bombay, to whom a claim was preferred for the refund of £9 on account of the additional cost of the passage declined to sanction it on the ground that the procedure laid down in Schedule IV to the Superior Civil Services (Revision of Pay and Pension) Rules, 1924, should have been followed. On a reference made to him on the subject, the Accountant-General has also pointed out that the supplementary Regulations published with the Government of India Notification No. F. 35 C S R., dated 8th February 1925, do not provide specifically for cases in which an officer in India wishes to engage passages for his family resident outside Asia. It is understood that the Government of India propose to issue amendments to these Regulations but it is not known whether they will contain any provision to meet cases of the kind under reference. In the circumstances stated I am to request that the Government of India may be moved in exercise of the power vested in them by the general provision in Part III of their notification referred to above to authorise the refund of £9 to Mr.....

(iv)

Letter from the Secretary, Services and General Department, India Office, to the Government of India, Home Department, No. S. & G. 4325/25, dated the 14th January 1926.

In reply to your letter No. 157/F 57 36-25-Esta., dated the 3rd December 1925, I am directed to inform you that the Secretary of State for India in Council has sanctioned, as a special case, the payment to Mr. ..... of the sum of £9 in respect of his wife's passage to India.

2 I am, however, to say that the Secretary of State in Council attaches importance to the maintenance of the rule that all payments on account of sea passages should be made direct to the Steamship Companies or their Agents and to request that it may be brought to the notice of officers to whom the Passage Regulations apply that in cases such as that of Mr..... the proper course is for the change of passage accommodation to be arranged through the Office of the High Commissioner for India.

PRESS COMMUNIQUÉ.

Ootacamund, June 17, 1926.

No. 158.—The Collectors' Conference was held at the Secretariat Buildings, Stonehouse Hill, from the 31st of May till the 8th of June 1926. The following is a brief description of the most important work done at the Conference

The weight to be attached to the general reputation of an officer for corruption or incompetence and the most suitable procedure for removing corrupt and incompetent officials from the service of Government were considered.

The importance of the maintenance of a properly demarcated boundary between British India and Indian States is generally recognized. The most suitable methods to be followed in periodically verifying and maintaining such boundaries according to the nature of the country through which they run were discussed.

Various details connected with the work of Revenue Inspectors and the supervision of their work by Divisional Officers and Tahsildars were discussed with the object of securing a more systematic inspection by the Revenue Inspector and a more systematic check over his work.

Certain questions connected with the assistance which may properly be given by Government officials to Local and Municipal bodies during Local Board and Municipal elections were considered.

The existing rules for the levy of ground-rent in urban areas were examined with the object of ascertaining whether they could not be re-drafted on a more elastic basis. The question whether it would be desirable to extend to non-municipal areas an arrangement similar to that now in force in municipal areas whereby all ground-rent in excess of Rs. 6-4-0 an acre is credited to the municipality concerned was also considered.

The precise object with which certain paramboke have been vested in Local bodies was discussed and certain administrative difficulties arising out of the fact that at the time when paramboke of the description of puntas and bathas were surveyed the paths running through them had been excluded by Government notification from the control of the Local bodies of the districts were discussed with the object of seeking the most satisfactory solution of those difficulties.

At present the administration of all plague measures is in the hands of the Collector of the district. The desirability of transferring the control of these measures to the President of the District Board and the Chairman of Municipal Councils acting in conjunction with the Public Health Department and so bringing the plague administration into line with the administration of other epidemic diseases was discussed in detail.

The possibility of decreasing the amount of delay which at present occurs in connexion with applications for the transfer of criminal cases and the possibility of improving the methods followed in preparing Government cases for presentation to the Civil Courts were considered.

In certain districts of the Presidency a system is at present followed whereby the ryot is permitted, at his option, to grow wet or dry crops on wet land under most of the irrigation sources of the fourth and fifth classes and wet or dry assessment is collected from him according to the class of crop which he grows. The scope and working of this concession were examined with the object of securing from it the maximum of convenience to the ryot.

The relative spheres of activity of the Members of the Legislative Council and the district officials in their relations with the people were examined with the object of securing the best possible understanding between the Members of the Legislative Council and the district officials in connexion with the administrative problems of the districts.

Possible methods for securing a more prompt realization of the land revenue were discussed in detail.

Various questions connected with the administration of the Criminal Tribes Act and the possibility and desirability of associating reclamation work with the administration of this Act were examined.

The methods to be followed in securing the most systematic and satisfactory expenditure of the grant for minor irrigation works were discussed.

The most suitable methods for securing the effective extension of the activities of the Discharged Prisoners' Aid Society into the districts were discussed.

A number of administrative problems connected with the special conditions existing in the Agency areas were discussed in detail.

DEPARTMENT OF INDUSTRIES AND LABOUR.

Simla, the 20th May 1926.

No. G. (B)-6 (4).—In exercise of the powers conferred by section 28 of the Indian Boilers Act, 1923 (V of 1923), the Governor General in Council is pleased to direct that the following further amendments shall be made in the Indian Boiler Regulations, 1924, namely :—

1. For sub-regulation (5) of regulation 20 of the said Regulations the following sub-regulation shall be substituted, namely :—

"(5) *Angle Bars.*—A cold or a temper bend test shall be made from each angle bar rolled."

2. In regulation 48 of the said Regulations after the words "(the longitudinal) seams shall" the words "where practicable," shall be inserted.

3. Regulation 49 of the said Regulations shall be re-numbered 48 (a) and after the regulation so re-numbered the following sub-regulation shall be inserted, namely :—

"(3) Where shell plates and end plates are connected by means of an external angle ring, as in the front ends of Lancashire and Cornish type boilers, the angle ring shall not be less in thickness than as follows :—

(i) For shell plates up to ⅝ inch in thickness.	Ten per cent in excess of the thickness of shell plate.
(ii) For shell plates between ⅝ inch and 1 inch in thickness	90 per cent of the thickness of shell plate
(iii) For shell plates exceeding one inch in thickness.	One inch.""

4. After sub-regulation (e) of regulation 67 of the said Regulations the following sub-regulation shall be inserted, namely :—

"(f) Where stay tubes are not fitted in lieu of tubes, as in tube plates of locomotive boilers, and parts of plate outside the space occupied by tubes are supported, in accordance with regulation 99 (3), by screwed stays each stay in the row nearest the tubes shall be of sufficient strength to support the plate up to the edges of the tube holes in addition to its share of the plate on the opposite side of the line of stays.

The working pressure for the plate between tubes and stays shall be determined by Eqn. (25), A being the horizontal pitch of the stays or the nearest row, B twice the distance between the centre line of stays and a line touching the tubes opposite them and C the co-efficient appropriate to the kind of stay."

5. In sub-regulation (*e*) of regulation 70 of the said Regulations, in the definition of D, after the words "whichever is applicable," the following shall be inserted, namely :—

"where the circle passes through only three of the possible five points of support mentioned the remaining two shall be embraced within the circle."

6. In regulation 76 of the said Regulations after the words "A is the area in square inches supported by one stay," the following shall be inserted, namely :—

"[For area to be supported by stays near tubes in firebox tube plates of loco-type boilers see regulation 67 (*f*)]."

7. At the end of sub-regulations (*d*) and (*e*) of regulation 92 of the said Regulations the following shall be inserted, namely :—

"For stresses allowed on the sections see regulation 81."

8. After regulation 112 of the said Regulations the following regulations shall be inserted, namely :—

"112-A.—*Corrugated Fireboxes of Vertical Boilers.*—For the semi spirally corrugated fireboxes of 'Scotinol" standard motor waggon boilers the working pressure shall be determined by the following formula :—

$$W.P. = \frac{C(t-1)}{D} \quad .. \quad .. \quad \text{Eqn. (65 A).}$$

t is the thickness of the firebox plate in 32nds of an inch,

D is the mean of the external diameters of firebox measured over the plain part at each end at commencement of curvature of flange,

C = 390.

112-B.—*Foundations of Vertical Boiler Furnaces.*—Where circular furnaces or fireboxes of vertical boilers are not connected to the shell crown by uptake tube, smoke tubes or bolt stays and the whole load on the fire box vertically is borne by the bottom part of the firebox where it is connected to the shell the working pressure for the part, if firebox is joggled out to meet the shell or if an ogee or Z angle ring is fitted, shall not exceed that found by the following formula :—

$$W.P. = \frac{C(t-1)^2}{D(D-D_1)} \quad .. \quad .. \quad \text{Eqn. (65 B).}$$

t is thickness of the joggled firebox plate, ogee ring or angle ring in 32nds of an inch,

D is the inside diameter of the boiler shell in inches,

D_1 is the outside diameter of the joggled firebox at the commencement of curvature above joggled part or the outside diameter of the firebox where it joins the ogee ring or angle ring,

C = 40 for joggled firebox or ogee ring,

C = 80 for Z angle ring.

112 C.—*Foundations of Loco type Boiler Fireboxes.*—Where the firebox roof is not stayed direct to the external casing crown or to girders carried by the casing or is not connected to the casing by stays in accordance with regulation 92 (*d*) and the whole load on the fire-box vertically is borne by the bottom parts of the firebox where connected to the external casing the working pressure for the parts, if plates are joggled out to meet the casing or if an ogee or Z angle ring is fitted, shall not exceed that found by the following formula :—

$$W.P. = \frac{C(t-1)^2 \times (L+W)}{L \times W\,(W-W_1)} \quad .. \quad \text{Eqn. (65 C).}$$

t is the thickness of the joggled firebox side plates or firehole (whichever is less), ogee ring or angle ring in 32nds of an inch,

L is the length of firebox casing in inches measured between the water sides of front and plate and saddle plate at the foundation seam,

W is the width of firebox casing in inches measured between the water sides of casing side plates at the foundation seam,

W_1 is the width of firebox in inches measured between the water sides of firebox side plates at the commencement of curvature above joggled part or where it joins the ogee ring or angle ring,

C = 70 for joggled plates or ogee ring,

C = 40 for Z angle ring.

Where only a comparatively narrow strip of the firebox roof is stayed directly to the casing crown the area so stayed shall be deducted from the area represented by L × W in the bottom line of the formula thus, $[L \times W - A](W - W_1)$ and so used in Equation (65 C) in determining the working pressure for the parts, "A" being the area in square inches of the part of roof supported by the casing crown."

9. In regulation 125 of the said Regulations (*c*) after the definition of C in sub-regulation (*d*) the following shall be inserted, namely :—

"The steel wire of which springs of direct spring loaded safety valves are made shall not be less than $\frac{1}{16}$ inch in diameter or side of square;" and

(ii) after sub-regulation (*m*) the following sub-regulation shall be inserted, namely :—

"(*n*) The number of coils of spring required for a given compression or the compression due to the load may be ascertained approximately by the following formulæ :—

$$N = \frac{K \times C \times d^4}{L \times D^3}$$

$$K = \frac{L \times D^3 \times N}{C \times d^4}$$

N is the number of free coils in spring,

K is the compression of spring in inches,

d is the diameter of round or side of square steel of which spring is made, in 16ths of an inch,

D is the diameter of spring from centre to centre of wire in inches,

L is the load on the spring in pounds,

C = 22 for round and 30 for square sectioned springs."

The Superintendent's opinion will be final on this point.

18. No article shall be supplied to the hospital except on authority signed by the Superintendent or by some responsible person authorized by him in writing to do so.

19. No person making a tender shall be allowed to withdraw his tender for the space of thirty days from the date thereof and in the event of his so doing his deposit shall be forfeited to Government.

20. Payment will be made after delivery on monthly bills by the Superintendent of the hospital. The date of payment by the Accountant-General, Madras, for their bills should be promptly intimated to this hospital by the contractors.

21. The contract rate should include charge for delivery of the articles at the hospital.

22. Every correction in the tender must be invariably initialled by the tenderer, failing which the tender will be rejected.

23. The quantity required shown against all articles in the groups of non perishable and perishable articles and other hospital requirements is only a probable one and will be more or less according to actual requirements. The Superintendent does not bind himself to reserve the full number or quantity noted in the schedules.

24. Government promissory notes lodged as earnest security money or security deposit for a period of twelve months or less shall not be endorsed over to the Superintendent but shall remain in the name of the depositor. Government will appropriate or cancel the notes as per G.O. No. 3358, dated 31st March 1896, authority to that effect being duly entered in the contract or other agreements executed by the depositor.

25. The successful contractor will be required to sign a bond and to pay the value of the proper stamp duty on the contract. Non-judicial stamp means the kind of paper that is used for the registration of documents in a Sub-Registrar's office or District Registrar's office. Court-fees or postage stamps should not be used.

26. The bread supplied to the hospital should be free from alum and yield, on acidity equivalent to not more than 3 c.c. normal acid per 100 grammes of bread. The maximum limit of ash permissible in the case of bread is 0·2 per cent (calculated on the dried solids) insoluble in dilute hydrochloric acid.

27. Samples of bread received from each tenderer will be subject to analysis by the Public Analyst, King Institute, Guindy.

28. The bread supplied to the hospital from time to time will be subject to analysis and the contractors will be liable to a penalty for exceeding the percentages laid down above. This penalty will be subject to the maximum of 10 per cent of the security amount deposited by the contractor.

29. The tenderer should attach a certificate to his tender or tenders to the following effect:—

"I, the tenderer, agree to have the earnest money confiscated to Government in case of my failure to undertake the tender".

30. The system of rounding of fractions of a rupee or an anna sanctioned in G.O. No. 685, Finance, dated 15th August 1925, will be adopted in all contractors' bills, i.e., (1) fractions less than half a rupee will be omitted and half a rupee and over will be taken as a rupee in the case of bills amounting to Rs. 25 and upwards; (2) fractions of less than six pies will be omitted and six pies and over will be taken as an anna in the case of bills amounting to less than Rs. 25.

31. The contractors should furnish at once specimens of their signature to the Accountant-General, Madras, along with their first contingent bills endorsed to them by this hospital to avoid any delay in the payment of their claims.

32. Any information regarding tenders may be had on personal application at this hospital.

Govt. General Hospital, Madras,
15th June 1926.

NOTICE.

The appointment of Government auctioneer will be sold in public auction by the Superintending Engineer, Madras Circle, or his nominee in the Public Works Department Office at Chepauk on the 19th July 1926 between 3 and 4 p.m.

2. The auctioneer will have to exercise his functions as such within the City of Madras and will have to hold auctions on his responsibility of all unserviceable Government articles or other properties of value that may be placed under his charge at any time and at any place within the municipal limits of Madras by the General Superintendent, Public Works Workshops and Stores, and the Executive Engineers of North and South Presidency Divisions and the Chingleput Division.

3. In the case of the Public Works Workshops and Stores the sale will be conducted under the supervision of the General Superintendent or his assistant and in the case of sales relating to Chepauk offices, the Executive Engineers concerned will arrange for the attendance of a subordinate officer to superintend such sales.

The auctioneer will be furnished with particulars of what he is required to sell in auction and in the case of the Public Works Stores, a detailed list will be furnished him and he shall fix the dates for the conducting of the auctions in communication with the officers concerned.

4. The auctioneer will make all necessary arrangements at his own cost for the auctions by the circulation of hand bills, advertisements in the local papers according to the magnitude of sales, etc., and submit to all Executive Engineers at Chepauk and to the General Superintendent, Public Works Workshops and Stores, copies of the hand-bills, whether the subject matter of the sales relate to those officers or not, not less than three clear working days before the date fixed for sale.

5. The highest bidder in the sales conducted by the auctioneer shall be the purchaser and the auctioneer will be held responsible for the realization of the amounts which should be remitted into the treasury to the credit of the Public Works Department within a week after the sales have been approved by competent authorities. Failure on the part of the auctioneer in this respect will render the amount being deducted from the auctioneer's security deposit.

6. In any case where payment by instalment is allowed, the auctioneer shall be held responsible for the full realization of the amounts on the agreed dates. Any loss arising from the infringement of

the above conditions will be deducted from the auctioneer's security and, if insufficient, the auctioneer shall make good the deficiency. All cases of disputes amongst bidders or between a bidder or bidders and the auctioneer after approval of the sale by the officers concerned shall be settled by the auctioneer himself at his own risk. Prior to approval of the sale, any case of dispute should be brought to the notice of the concerned approving officer for immediate settlement.

7. In conducting the auctions, the auctioneer will maintain a bidders' list for each lot giving the name of the bidder and the amount as the auction proceeds so that there may be no complaint from the bidders that their bids have not been considered. On completion of the auctions, all bidders' lists will be sent to the officers concerned for approval.

8. The auction of each lot shall be subject to a reserve price which shall be stated by the auctioneer. If the highest bid falls below the reserve price, the reasons therefor shall be clearly set forth in the bidders' list for the information of the officers concerned.

9. The General Superintendent or the Executive Engineer concerned reserves to himself the right of accepting or rejecting the highest or any other bid without assigning any reasons. When once the sale is approved by the officer concerned, the auctioneer will be held responsible for the full realization of the amount bid. Once purchasers are allowed to enter into possession, any amount that remains unrecovered shall be deducted from the security of the auctioneer and, if insufficient, the auctioneer shall make good the deficiency.

10. All articles sold will be at the risk of the successful bidder and the auctioneer till cleared.

11. The auctioneer will see that the articles sold are removed by the purchaser within ten days of the date of payment. For articles not so removed, a ground rent of As. 4 per lot per day will be recovered from the security of the auctioneer, if not paid in cash.

12. No lot will be removed by the purchaser until the receipt of payment from the auctioneer is produced to the subordinates deputed by the Executive Engineers. In the case of Public Works Workshops, in addition to the above, a gate pass signed by the store-keeper shall be presented to the gate sergeant for check and pass.

13. If the sale amount of any of the lot be not realized within a reasonable time, the lot will have to be resold with the permission of competent authority, the loss incurred thereby being made good by the auctioneer.

14. If any sale conducted by the auctioneer is considered by the General Superintendent or the Executive Engineer concerned not to have been properly advertised or that there was any fraud, the sale will be held afresh by the officer concerned after due advertisement, the cost of which will be recovered from the auctioneer and the expenses of the unapproved sale will be borne by himself, whereas he (the auctioneer) will be entitled to no commission on any such sale held by the department directly.

15. In cases of stoppage of sale by the department after authorised and proper advertisement by the auctioneer, his actual expenses limited to 2 per cent of the estimated value of the objects advertised for sale will be refunded to the auctioneer.

16. As consideration for the work required to be done by the auctioneer on the foregoing conditions, he will be paid a certain percentage of the gross amount realized in auction which can be deducted before he remits the realizations into the treasury as required in clause 6 above. This rate of commission will be sold in auction as stated in clause 1 and he who bids the lowest will be appointed as the auctioneer.

17. Every intending bidder will have to deposit an earnest money of Rs. 500 before he begins to bid and the successful bidder will have to deposit a further sum of Rs. 500 within a week after his nomination as auctioneer.

18. The earnest money of Rs. 500 should be remitted either by postal money order or paid to the Personal Assistant to the Superintending Engineer on or before 5 p.m. on the 17th July 1926 and the intending bidders should submit by registered post to the address of Superintending Engineer, Madras Circle, their credentials showing their experience in this line of business and in what other lines they are engaged together with the address of their headquarters.

19. The said deposit amount will be in the custody of the Superintending Engineer as security for the execution of the agreement which the auctioneer appointed will have to execute comprising the foregoing conditions, the currency of the agreement will be for three years from the date of assumption of duties. If the appointed auctioneer fails to execute the agreement within a week after he is appointed, his earnest money will be forfeited to Government and a fresh auction held.

20. If the appointed auctioneer gives up his post before the period of three years, his deposit will be returned to make good the extra percentage of commission that may have to be paid to his successor as also to meet other losses the department may incur on account of his default. If the deposit is found insufficient to fully cover such losses, the defaulting auctioneer and his heirs or assigns will be liable to make good any balance due.

21. On the other hand, if, within the said period of three years, it is found that the services of the auctioneer should be terminated, the agreement will be cancelled at a month's clear notice to the end of a calendar month to be given by the Superintending Engineer. No reasons will be assigned for such termination of service.

P. V. MANIKKAM NAYAKAR,
Superintending Engineer, Madras Circle.
